-----------------------------------------------

## HOBBIES

Reading • Learning new things • Meditation •Self Improvement • Problem-Solving

## OBJECTIVE

Aspiring front-end developer with a background in mechanical engineering and a solid foundation in HTML, CSS, JavaScript, Bootstrap, and jQuery, seeking an internship position to apply and further enhance my skills in a dynamic and collaborative web development environment.

## PROJECT WORK

### A Personal Portfolio Website                    Live Website Demo

- **Developed a fully responsive portfolio** website utilizing HTML, CSS, JavaScript, and Bootstrap to showcase proficiency in web development.
- Highlighted project works and demonstrated skills acquired throughout the journey.
- **Technical Skills:**
- **Bootstrap:**
  - Employed Bootstrap to integrate pre-built components for efficiency.
  - Utilized Bootstrap classes to craft visually appealing and functional design components.
- **CSS:**
  - Applied custom CSS to tailor the website's design to specific requirements.
  - Implemented media queries to ensure a responsive design for various screen sizes.
  - Incorporated CSS animations to dynamically showcase my project works.
- **JavaScript:**
  - Developed JavaScript code to create a dynamic navigation bar.
- Leveraged responsive design techniques, guaranteeing a seamless user experience across diverse devices, including desktops, smartphones, and tablets.

### Productive Quote Generator + To-Do App          Live Website Demo

- **Engineered a dynamic To-Do list integrated with a random productive quote generator.** The objective was to boost task execution by incorporating motivational quotes.
- **Bootstrap**:
  - Employed Bootstrap's pre-built components and classes for enhanced efficiency.
  - Integrated Bootstrap cards, buttons, and tables to create a seamless user interface.
  - Implemented custom styling with CSS for a personalized touch.
  - Followed a mobile-first approach to ensure responsiveness.
- **JavaScript**:
- Random Quote Generator:
  - Developed a random quote generator using an API.
  - Utilized asynchronous programming with async/await and fetch for efficient data retrieval.
- To-Do List:
  - Implemented full functionality, including add, delete, edit, and mark as completed tasks.
  - Employed various JavaScript functions to enhance user interaction.
- Successfully crafted an engaging application that combines productivity with motivation, using Bootstrap for efficient design and JavaScript for dynamic functionality.
